N O T I C E

TO: OCCUPANTS OF 19TH FLOOR - ONE WORLD TRADE CENTER
FROM: Richard Peduto
DATE: January 6, 1994
SUBJECT: CEILING TILE REMOVAL ON THE 19TH FLOOR

This morning, Port Authority staff found fragments of ceiling tiles and fireproofing material in the main corridors and in one of the ladies' rest rooms.

Inasmuch as the 19th floor has fireproofing above the ceiling tile that is asbestos containing, we have initiated the controlling of walking on surfaces within the corridors and other areas which have debris, pending appropriate clean-up.

As a precaution, we have placed paper over areas where there is debris and have initiated air monitoring within the corridors.

Since we may restrict corridor use, we ask your assistance when we commence the clean-up so as to allow the contractor to perform the clean-up carefully and expeditiously. We hope to clean-up the areas as soon as possible.

If you have any questions concerning this matter, please contact me directly at 435-5566.
